About me

I succeeded visual problem solving due to strategic thinking, good attention to details and perception about Client's needs, good sense for color and composition. I designed a number of e-commerce websites, mobile applications, and enterprise applications. I looking for opportunities to work on technically challenging projects, requiring the ability to deeper explore digital design horizons.

- Extended experience in implementing complex enterprise level projects
- Proficient in UI/UX design, prototyping for complex web&mobile systems
- Performed Graphic design for web and mobile
- Basic understanding of HTML, CSS, and Javascript
- Basic understanding of the development process
- Understanding industrial and brand standards
- Pre-development and pre-print processing
- Logo, branding, corporate style, info graphics, icons
- Ability to work with customer's requirements and programmer's teams
- Ability to manage multiple tasks, prioritize work, provide time estimates, and meet deadlines while under pressure.
- Ability to work as both a team member and independently
- Strong analytical and problem-solving skills

Technical skill

Fluent with design tools: Sketch, Adobe Photoshop, InVision, Zeplin, Adobe Illustrator, Figma, Google Web Designer

Prototyping: Adobe Experience Design, Axure RP, Wireframe.cc

Animation: Principle, Adobe AfterEffects, Adobe Premiere

Work history

UI/UX designer (3 years 2 month)

Freelance

- Created user interfaces and websites using best practices in front-end design, while providing both static and responsive solutions as necessary.
- Translated design ideas (design mockups, wireframes, and prototypes) into clean, W3C-compliant HTML, CSS and JavaScript markup to be used by developers.
- Create design mockups, visual assets and content for a variety of web and digital applications including: icons, images, infographics, menus, charts, dashboards, etc.
- Creating style guides and pixel perfect specifications for iconography, web framework components, assets, apps and further evolve them
- Creating GUI for Android
- Designed native tablet and mobile apps for iOS, Android(tablet and mobile) , IOS and Marcos
- Owned and defined design guidelines and usability standards.
- Creating icon design and font icons
- Creating interactive design
- Creating prototyping for mobile and desktop apps

Senior Graphic Designer (1 year 5 month)

E-COM

- Identified usability problems with designs and interfaces and make recommendations based upon best UX practices and principles.
- Creation of look and feel of web –resources and web-solutions. UI/UX design of sites, e-commerces, social communities, web-applications.
- Ensured there is clarity between design and development, and provide clear design guidance to software engineers for implementation.
- Design of mock-ups for different kinds of enterprise print products, company styles development, posters, flyers, booklets, labels, business cards.
- Presentation of the service to the new companies and consultants
- Created user experience designs from documented use cases and user stories
- Documented design concepts or ideas as demonstrable solution

E-learning Course Designer

Skillim (5 month)

- Created an e-learning course – business aim analysis, storyboard and script writing, course development and testing
- Designed user guides, job aids, reports, presentations, posters, flyers, and internal documentation for training and marketing
- Work with photo manipulation, custom illustration, typography, lettering and web layout
- Created prototypes, storyboards, and design documentation that effectively communicate design
- Analyzed target audience, job tasks, learner environment, and existing content to identify appropriate instructional strategies
